Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and TechRate and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (TechRate) owe no duty of care towards you or any other person, nor does TechRate make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and TechRate hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, TechRate hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against TechRate, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

Background

TechRate was commissioned by GalaxyFinance to perform an audit of smart contracts:

- <https://bscscan.com/address/0xE77932B1216125848e82C3967e75698362168f99#code>
- <https://bscscan.com/address/0xC8b44fc9e6B8FD806111A04b1f208A0087BAF9b1#code>
- <https://bscscan.com/address/0xe1D4661a28f0Bdc8CfB0E796dF91EcCFE495B145#code>

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended.
- Identify potential security issues with the smart contract.

The information in this report should be used to understand the risk exposure of the smart contract, and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

Contracts Details

Token contract details for 19.05.2022

Contract name GalaxyFinanceToken

Contract address 0xE77932B1216125848e82C3967e75698362168f99

Total supply 36,010,002.676845

Token ticker GFT

Decimals 18

Token holders 359

Transactions count 779

Top 100 holders dominance 98.39%

Contract deployer address 0x66548d85d365d4589c29dbfe2eea27cccf342e32

Owner address 0x66548d85d365d4589c29dbfe2eea27cccf342e32

GalaxyFinanceToken Token Distribution

The top 100 holders collectively own 98.39% (35,431,751.02 Tokens) of GalaxyFinanceToken

Token Total Supply: 36,010,002.68 Token | Total Token Holders: 359

GalaxyFinanceToken Top 100 Token Holders

Issues Checking Status

| Issue description | Checking status |
|---|-----------------|
| 1. Compiler errors. | Passed |
| 2. Race conditions and Reentrancy. Cross-function race conditions. | Passed |
| 3. Possible delays in data delivery. | Passed |
| 4. Oracle calls. | Passed |
| 5. Front running. | Passed |
| 6. Timestamp dependence. | Passed |
| 7. Integer Overflow and Underflow. | Passed |
| 8. DoS with Revert. | Passed |
| 9. DoS with block gas limit. | Low issues |
| 10. Methods execution permissions. | Passed |
| 11. Economy model of the contract. | Passed |
| 12. The impact of the exchange rate on the logic. | Passed |
| 13. Private user data leaks. | Passed |
| 14. Malicious Event log. | Passed |
| 15. Scoping and Declarations. | Passed |
| 16. Uninitialized storage pointers. | Passed |
| 17. Arithmetic accuracy. | Passed |
| 18. Design Logic. | Low issues |
| 19. Cross-function race conditions. | Passed |
| 20. Safe Open Zeppelin contracts implementation and usage. | Passed |
| 21. Fallback function security. | Passed |

Security Issues

✓ High Severity Issues

No high severity issues found.

✓ Medium Severity Issues

No medium severity issues found.

✓ Low Severity Issues

1. Out of gas

Issue:

- `add(uint256 _allocPoint, ...)`, `set(uint256 _pid, ...)` could invoke `massUpdatePools()` function, that can fail due to block gas limit if the pool size is too big.
- `Migration()` function that can fail due to block gas limit if the referrer's array size is too big

Recommendation:

Check that the arrays' length is not too big.

2. add function issue

Issue:

- If some LP token is added to the contract twice using function `add`, then the total amount of reward in function `updatePool()` will be incorrect.

Recommendation:

Add the mapping from address to bool and check that same address will not be added twice.

Notes:

- There is sending tokens to the dead address in overridden `_transfer` functions, instead of burning them in token contract.

Owner privileges (In the period when the owner is not renounced)

- GlxReferral:
 - Owner can remove referrers.
 - Owner can change operator of the contract.
 - Owner can drain tokens that are sent to the referral contract which is useful for withdrawing tokens sent by mistake to the contract.
 - Owner can change the operator of the referral contract.
 - Operator can migrate.
 - Operator can change referral commission rate.
 - Operator can add/remove total funds.
 - Operator can change maximumLoop.
 - Operator can change total funds.
- GalaxyChef:
 - Owner can change newChefAddress.
 - Owner can enable/disable isMigrating value.
 - Owner can change referDepth and referralCommissionTier.
 - Owner can change tokenLPAddress and pancakeRouterV2.
 - Owner can change lockingRequirement.
 - Owner can change busdAddress and glxReferral.
 - Owner can enable/disable emergencyLockingWithdrawEnable value.
