

HoneyFarm Smart Contract Security Audit

TechRate July, 2021

Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the below disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and TechRate and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (TechRate) owe no duty of care towards you or any other person, nor does TechRate make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and TechRate hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, TechRate hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against TechRate, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

Background

TechRate was commissioned by HoneyFarm to perform an audit of smart contracts:

- https://bscscan.com/address/0x09Bfd9BEA89db8a0Cc1bFB5b3e0c39c84E7F3 8B5#code (Yetimaster)
- https://github.com/RenovJ/honeyfarmcontracts/commit/284b4d3cfe99d1b90bfbe94040b1c674c144f863 (HoneyReferral.sol, HoneyToken.sol)

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended.
- Identify potential security issues with the smart contract.

101000001

1.0

1000000

The information in this report should be used to understand the risk exposure of the smart contract, and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

Issues Checking Status

Is	sue description	Checking status
1. C	ompiler errors.	Passed
	ace conditions and Reentrancy. Cross-function race onditions.	Passed
3. Po	ossible delays in data delivery.	Passed
4. O	racle calls.	Passed
5. Fr	ront running.	Passed
6. Ti	imestamp dependence.	Passed
7. In	teger Overflow and Underflow.	Passed
8. D	oS with Revert.	Passed
9. D	oS with block gas limit.	Low issues
10. M	ethods execution permissions.	Passed
11. Ed	conomy model of the contract.	Passed
12. Th	he impact of the exchange rate on the logic.	Passed
13. Pı	rivate user data leaks.	Passed
14. M	alicious Event log.	Passed
15. Sc	coping and Declarations.	Passed
16. U	ninitialized storage pointers.	Passed
17. A	rithmetic accuracy.	Passed
18. D	esign Logic.	Low issues
19. C	ross-function race conditions.	Passed
	afe Open Zeppelin contracts implementation and sage.	Passed
21. Fa	allback function security.	Passed

Security Issues

⊘ High Severity Issues

No high severity issues found.

✓ Medium Severity Issues

No medium severity issues found.

Low Severity Issues

1. Block gas limit

Issue:

The massUpdatePools() function can fail due to block gas limit if the pool size is too big.

2. add function issue

Issue:

If some LP token is added to the contract twice using function add, then the total amount of reward in function updatePool will be incorrect.

Recommendation:

Add the mapping from address to bool and check that same address will not be added twice.

Notes:

- There is sending tokens to the dead address in overridden _transfer functions, instead of burning them in token contract.
- Key functions of the YetiMaster contract has IStrategy interface using, that could not be audited.
- Every pool update there is minting dev reward in the same amount as user reward.

Owner privileges

- Owner can drain tokens that are sent to the referral contract which is useful for withdrawing tokens sent by mistake to the contract.
- Owner can withdraw BEP20 tokens.
- Owner can change dev and fee addresses.
- Owner can change earningReferral.
- Owner can change referral commission rate.
- Owner can change owner of earningToken.
- Operator can change the transfer tax rate.
- Operator can change transfer operators rights.

Conclusion

Smart contracts contain low severity issues!

Try not to stake native coins.

The further transfers and operations with the funds raise are not related to this particular contract.

TechRate note:

Please check the disclaimer above and note, the audit makes no statements or warranties on business model, investment attractiveness or code sustainability. The report is provided for the only contract mentioned in the report and does not include any other potential contracts deployed by Owner.
